

HARVY CASSIDY

Systems Administrator

Santa Cruz de Tenerife, Spain • +34 606 927 948 • hgccassidy@gmail.com • hgccassidy.github.io/tech/en

PROFILE

Systems Administrator with 15+ years of hands-on experience managing multi-site corporate IT infrastructure. Skilled in hybrid environments (On-Premise, Azure, M365), server virtualization (VMware/Hyper-V) and network security (FortiGate, firewall hardening). Experienced maintaining 99.9% uptime SLAs and reducing mean time to detect (MTTD) by 40% through proactive monitoring with Grafana/Checkmk. Comfortable working independently in remote environments, with a strong focus on system reliability, automation (PowerShell/Bash), multi-platform user support (Windows, macOS, Linux), and device lifecycle management (MDM).

TECHNICAL SKILLS

Virtualization: VMware ESXi, Microsoft Hyper-V, high-availability clusters and failover

Cloud & Hybrid Infrastructure: Microsoft Azure (user/permissions administration, VM operations, backup and storage monitoring), Microsoft 365

Infrastructure: Windows Server, Linux (Ubuntu/CentOS/Zorin OS), macOS, Active Directory, GPO, ADFS, DNS, DHCP, DFS, Print Servers

Network & Perimeter Security: Cisco routers & switches, FortiGate, VPN, VLAN, firewalls, system hardening, SentinelOne (EDR/Antivirus)

Corporate Messaging: Exchange Server (on-premise & hybrid), Microsoft 365

Backup & Disaster Recovery: Commvault, Veritas Backup Exec, DR planning and testing

Storage: Dell EMC SAN, TrueNAS

Device Management: MDM (Mobile Device Management), inventory tracking, device provisioning & lifecycle management

Monitoring & Incidents: Grafana, Checkmk, Power BI, webhooks, SLAs, KPIs

Automation & Scripting: PowerShell, Bash, Power Automate, REST/JSON APIs

Databases: MS SQL Server, MariaDB, MySQL

ERP, CRM & Service Management: Microsoft Dynamics GP, SAP Basis, ServiceNow, GLPI, Vtiger, Jira (ticketing & project tracking)

Project & Service Management: ITIL, PM², Scrum, Kanban, Jira, Microsoft Project

EXPERIENCE

Systems Administrator N3 — Inerza-Inetel (Canary Islands Brewing Company)

03/2022 - 10/2025

- Managed 60 VMware ESXi servers (Windows/Linux) with high availability, achieving 99.9% SLA and reducing MTTD by 40% with Grafana/Checkmk.
- Administered critical infrastructure: AD, DNS, DHCP, GPO, hybrid Exchange/M365 and FortiGate perimeter security with hardening.
- Implemented intelligent monitoring with Checkmk and automated webhooks to MS Teams for real-time notifications.
- Administered multi-site corporate infrastructure across the Canary Islands and two industrial plants in La Dorada, including VM migration on Hyper-V for failover and disaster recovery.
- Led the OS migration (Windows/macOS) of a 700-endpoint fleet, managing the entire device lifecycle, hardware inventory, and deployment with zero downtime.
- Managed and resolved high-priority technical support requests through Jira and ServiceNow, ensuring compliance with internal IT security policies and operational standards.
- Led the ITSM migration from GLPI to ServiceNow, rebuilding incident/request workflows and populating the CMDB.
- Automated AD audits with PowerShell, eliminating manual processes and generating compliance reports.

Systems Administrator N2 — Inversiones Voltaire

05/2019 - 09/2021

- Administered VMware/Hyper-V environments and corporate services (Windows Server, AD, Exchange) for a nationwide organization.
- Provided multi-platform technical support (Windows, Linux, macOS) for remote and on-site employees, maintaining updated technical documentation and system procedures.
- Consolidated 8 physical hosts into 3 VMware ESXi nodes, reducing physical hardware and energy footprint by 60%.
- Deployed a VoIP PBX across sites over Site-to-Site VPN, cutting telephony costs by 80%.
- Automated processes with PowerShell and Power Automate, reducing manual intervention; designed backup/DR strategies ensuring business continuity.

IT Infrastructure Coordinator — Stellionet, C.A.

10/2014 - 04/2019

- Deployed critical infrastructure (servers, networking, Dell EMC SAN, TrueNAS), coordinating technical teams and external vendors.
- Virtualized servers with VMware ESXi in high availability; administered Windows Server (Windows clustering, DFS, AD, GPO, print servers) and VLAN segmentation.

EDUCATION & CERTIFICATIONS

Microsoft Certified Professional (MCP)

MCP ID: 3357452

Systems Engineer

Universidad Nacional Abierta — 2000 - 2006

Additional Training

PM² Essentials (TecnoFor) · Generative AI (TecnoFor) · Apollo 13 — Crisis Management

LANGUAGES

Spanish — Native

English — B2
